Description

Tri-State Bidirectional Transceiver (Non Inverting)

- 8-bit bidirectional data flow reduces system package count
- Bidirectional Tri-State Inputs / Outputs Interface with Bus Oriented Systems
- PNP Inputs Reduce Loading
- Output High Voltage Interfaces with TTL, MOS and CMOS
- 48 mA / 300 pF Bus Drive Capacity
- Pinouts Simplify System Interconnections
- Transmit/Recieve and Chip Disable Simplify Control Logic
- Compact 20-pin DIP
- Bus Port Glitch Free Power Up / Down.

(Data taken from National Semiconductor DP7304B/DP8304B Datasheet)
